PLEASE READ THE FOLLOWING DOCUMENT BEFORE CONNECTING OR OPERATING ANY SUBMERSIBLE PUMP SUPPLIED BY ABG:

RISK ASSESSMENT SUBMERSIBLE PUMPS

- A circuit breaker for earth leakage should be used with the pump to ensure user safety.
- The supplier / hirer of this equipment, have a duty of care to ensure that at all times the pump is in safe working order.
- The user / hirer of this product, have a duty of care to ensure at all times the pump is operated safely.
- Check all leads for defects, cuts, loose wires etc. before use.
- At no time should the pump be raised or lowered using the power cable, the excessive strain on the cable will cause damage. A rope should be fitted to the pump for lifting purposes.
- The pump operates on 240V AC, and should only be accessed internally by a qualified electrician.
- Care should be taken when lifting the pump, as the weight may be over 20kg.
- Prior to moving the pump in a wet area ensure that the pump is turned off.
- The use of extension cords and/ or double adaptors is discouraged. If an extension cord is necessary it should be as short as possible.
- Do not allow electrical leads to trail into mud and water.

For further information about pumping please contact Airdraulic Birco Group on the following numbers:
